

FASHION SHOW

One student from each partner country could parade in a recycled outfit made by the students of that country.

A competition will be held among the 5 recycled outfits with a prize for the one with the most votes.

FAIR

Each country should bring 5 types of objects for the fair, 4 pieces of each of them.
(That makes 20 objects out of recycled materials.)

The objects should be easy to transport to and from the partner country.

Students will "buy" objects from their "Galaxy money"

and will be challenged how to handle their budget – which is 10 coins.

(Each partner school should decide on the price of the objects - 1, 2 or 3 coins -previously.)
